Mr. Robert Young
WUNC-TV
University of North Carolina at
Greensboro, North Carolina

Dear Mr. Young:

George Hall has suggested that I write to you as a matter of record concerning conversations that he has had with you over the possibility of a surplus FM transmitter becoming available in the near future. It is my understanding that your operation may have available this piece of equipment that could possibly be procured by North Carolina State to facilitate their changing their carrier current to an educational FM facility.

Please correct me if my information is in error, and bring me up to date with the current status of your station. Thank you very much for your cooperation and interest.

Sincerely,

Gerald G. Hawkins
Assistant Director
Student Activities
